Academic Tutor

Saarland University - Martin Schmitz

Classroom tutor at Universität des Saarlandes in **Human-Computer Interaction** lecture.

27/04/2021 – 30/09/2021 – Trento, Italy

Thesis and Internship

Fondazione Bruno Kessler - Silvio Ranise

Study on the **Italian electronic identity card (CIE 3.0)**. It can be used for authentication using its cryptographic capabilities and the **NFC** (Near Field Communication) protocol.

We explored different scenarios, such as using CIE 3.0 replacement for the business badge.

In this context, I developed the infrastructure to use CIE 3.0 to enroll and **access a predefined set of enterprise services** - such as pull-printing, clocking in/out, and canteen. All the components are open-source, easily deployed and migrated, and developed **according to the current security best practices**.

CySec Project Summer Term '21

CISPA Helmholtz Center for Information Security - BITAHoy - Roman Tabachnikov

The project focuses on the risks attached to poorly developed **smart-home (connected) devices**, that carry an inherited risk to the data of its user be it through a **vulnerability or a malicious interaction** by a 3rd party. Mainly we focus on **IoT/smart devices**, excluding personal devices such as mobile phones and PCs. This is due to the scope; unlike IoT devices, personal devices have a wide variety of features and thus people use their personal devices differently.
